The various versions of the 3642 and 3742 are identified by a product code number (catalog number) for the pump. The meaning of each digit in the product code number is shown below.

3500 RPM Close Coupled
Example Product Code 1BF11512

Frame Mounted Pumps Only
Example Product Code F1BF05

Note: Not recommended for operation beyond printed H-Q curve.

For critical application conditions consult factory.

Not all combinations of motor, impeller and seal options are available for every pump model. Contact Customer Service for information on non-cataloged order numbers.

① 575 Volt models are available, prices may vary, lead times may be longer. Use the nomenclature page to create a 575 volt Order Number
